

Perfect PLANES

GET READY FOR A NEW YOU – AN EASY AND PAINLESS SOLUTION IS AVAILABLE TO END YOUR AGEING WOES

While keeping an active lifestyle is essential to maintaining a youthful semblance, the process of ageing is inevitable, and with it, heavy lines, sagging skin and aged jowls that no amount of exercise can eliminate. As much as severe lines can be attractive, a young and energetic appearance is far more appealing to most.

NU.U offers a quick and painless solution for your woes with the Acculift system, the latest in facial contouring methods to contain the effects of age. The Acculift system is available only in NU.U, and employs the latest technology to recover the sharp chiselled features you once possessed.

While methods such as Botox and other machines offer options for facial contouring, Acculift is a one-time solution that can instantly remove the effects of five to 10 years of ageing, and lasts up to two years. With an extremely short downtime of one to two days, it is a procedure that can be performed prior to the weekend, with you returning to the office in tip-top condition and rejuvenated.

Unlike other methods, Acculift uses needle punctures that are unnoticeable and require no suturing, and employs a laser only 600 microns across to emulsify the fat under the skin and also cause tissue contraction and collagen remodelling at the same time, all of which lift the skin and prolong the effect of the procedure. Acculift can eliminate naso labial folds, double chins, jowls, so that the face appears slimmer immediately. Acculift is

Dip Aesthetic Med (US)

also safe for use around the sensitive skin of the eyes.

The effects are quickly noticeable: for men over their 40s, double chins and sagging skin around the cheeks are reduced, offering the appearance of a much younger man. Younger men can easily remove baby fat and other troubles, giving you the chiselled jaw-line that you've always sought, without the need to go under the knife and with virtually no downtime at all.

As the first clinic to use Acculift, Dr Chew, head of NU.U, has been specially trained to

handle the machine and is also authorised to train other doctors on the use of Acculift. NU.U offers you the opportunity to take away the stresses of urban life off your face, so you can enjoy the attention you deserve with ease.

Nu.U Aesthetic Wellness Clinic is at 290 Orchard Road #09-18/19 Paragon Medical Suites, tel: 6732 9989. www.nuuclinic.com
