

Perfect Skin

EASY SOLUTIONS TO GOOD SKIN ARE NOT IMPOSSIBLE

John Lennon once famously said that “the most important thing is to have clean skin”. The benefits of healthy skin cannot be undermined; it offers confidence and the appearance of well-being to any man.

Urban stresses can often contribute to imbalances in the body, namely the production of testosterone and affects the skin due to the over-secretion of oil in sebum glands, which can thus result in acne. For some people, a genetic predisposition to acne can also result in the inflammation of the pores. But NU.U offers methods to control your skin problems.

LASER TREATMENT

A quick, effective and fuss-free method that NU.U offers is the Smartxide fractionated CO2 laser peel, a new and improved treatment over the laser peels of old. Employing a laser that is split into microscopic beams, it reduces the intensity of the peel so as to eliminate the possibility of inflammation and removes only a fraction of the epidermis. This means that the beams are precisely targeted and does not affect healthy skin. The beams also stimulate the growth of collagen. The process is quick, with virtually no after effects. Within one to three days, the skin is rejuvenated and healthy.

The Smartxide dot peel is also good for removing fine lines, repairing sun-damaged skin and removing acne scarring, which can occur due to improper care of the skin.

ALTERNATIVE TREATMENTS

If you prefer other methods of preventing and removing acne, topical and oral medication is also available at NU.U. Oral medication such as antibiotics can help eliminate breakouts, while topical products control the production of oil and prevent inflammation of the oil ducts under the skin, thus stopping the development of acne.

Naturally, the best cure is prevention, and NU.U offers a skin renewal serum that contains alpha and beta hydroxy acids as well as hyaluronates. The serum removes blackheads and impurities from the skin, preventing the clogging of the pores that can then lead to acne.

NU.U offers effective and fuss-free solutions to healthy skin, with practical solutions to your skin care needs.

Nu.U Aesthetic Wellness Clinic is at 290 Orchard Road #09-18/19 Paragon Medical Suites, tel: 6732 9989. www.nuclinic.com
