BEAUTY BREAKTHROUGH
OF THE YEAR

THE NEW BEST-IN- CLASS LASER FOR WHITENING

Are stubborn dark spots starting to take up permanent residency on your face? Before they turn darker and uglier, zap them away with Excel V, the new elite laser in town yet with three modes for unmatched precision and versatility.

What if the **photo filters** on your phone worked in **real life?**

Wouldn't it be great if we can look flawless without resorting to smartphone editing apps? Now we can, with the Excel V laser that zeroes in to dark spots, acne scars, and freckles and blasts them away with laser precision.

Are big bad blotches, melanin marks, and pesky pigmentation taking the radiance away from your face? Envy-worthy porcelain skin is no longer a pipe dream with the latest elite treatment in town.

Meet Excel V, the new gold standard in lasers that blasts blemishes in three ways. Able to erase the spots caused by the summer sun or other imperfections caused by both genetic or environmental factors, it is your answer to an array of skin woes – port-wine stains, sun spots, rosacea, diffuse redness, lentigines, oversized pores, spider veins, you name it.

What makes it so special? Simply put, this award-winning Excel V is the only tunable laser system on the market that combines two ultra-precise, best-in-class laser wavelengths (532/1064nm) in one device.

Three words can be used to describe the Excel V laser – “Speed, versatility and safety are what come to mind,” Jeffrey T.S. Hsu, M.D., F.A.A.D., co-director of dermatologic, laser and cosmetic surgery at The Dermatology Institute in Illinois told Aesthetic Guide.

“This laser has revolutionised the treatment of spider veins, rosacea, diffuse redness, facial telangiectasia, cherry angiomas and port-wine stains.”

“Over the years, we had to purchase different lasers to treat these conditions. Now with the Excel V, we can go from a large to small spot size, change the pulse duration and the wavelength, and choose the appropriate fluence to treat multiple conditions in one sitting, with incredible ease.”

REASONS TO LOVE EXCEL V

1 Hello, bespoke beauty

It makes your life easier by the sheer amount of skin conditions it can treat – so you won't need to hunt for different lasers for different problems! It does this with three different modes that can give you highly customisable solutions. It has proven popular with women of all ages overseas as it targets all layers of the skin associated with skin ageing, and it also improves acne lesions.

2 Instant results? Yes please!

You can see an immediate payoff, thanks to the Coolview Handpiece with a sapphire window. The feedback from patients so far has been overwhelming positive, according to Dr Hsu. “The instant results achieved from Excel V invariably create a ‘wow’ factor. Having a safe, fast, and effective laser adds a dimension that attracts patients I would not be able to attract with other lasers,” he told Aesthetic Guide.

3 High comfort levels

The safety and comfort level of this treatment are enhanced by pre-cooling, cooling during treatment, and post-cooling – all between 5° C to 20° C. Some patients may experience some redness and swelling, which is transient. Best of all, you walk out with more flawless skin straightaway, with little to no downtime.

3 MODES MANY BENEFITS

3 WAYS TO COMPLEXION PERFECTION

Delivering precision treatment parameters with unmatched versatility, Excel V has the flexibility to treat any case, from superficial and deep vascular conditions to benign pigmented lesions - all thanks to its three distinct operating modes! By customising the modes to be used, your physician can treat a multitude of the skin imperfections plaguing you.

1 BUST SUPERFICIAL SPOTS

MODE 1 - 532nm: This high-energy pulsed laser treats superficial conditions like brown spots, discreet blood vessels or telangiectasia, diffuse redness, red port wine stains, poikiloderma, surface pigmentation.

2 ERADICATE DEEPER PIGMENTATION

MODE 2 - 1064nm: This long-pulsed laser treats deeper flushing-like redness, deeper pigmentation in the dermis and helps stimulate collagen. It also extends treatments to venous malformations, venous lakes, nodular port wine stains, and leg veins.

3 EXUDE FRESH RADIANCE

MODE 3 - Laser Genesis Micro-Pulse: This microsecond 1064nm laser enables facial rejuvenation, diffuse redness, scars, pore size reduction.

Rather than depend on photo filters or heavy concealers to hide your skin concerns, consider a lasting solution with Excel V!

Want to see improvements on these conditions and more?

Enlarged pores

Unightly Rosacea

Pigmentation

Dull & Patchy Skin tone

Skin laxity and inelasticity

BEFORE

AFTER

Acne Scarring

BEFORE

AFTER

Discolouration

All you need are about four sessions, depending on your skin condition. Check with your physician on your Excel V treatment today.

Q & A

What is Excel V?

Excel V is the most advanced aesthetic technology that combines two powerfully precise lasers to target and eliminate vascular concerns (redness, unsightly veins) and benign pigmented lesions (age spots, sun spots, discoloration) on the face and body.

What does Excel V treat?

Excel V treats nearly 20 unique aesthetic and dermatologic skin concerns. The most common excel V treatments include rosacea, facial and leg veins, age/brown spots, and acne scars.

How does it work?

Your treatment provider will select one of excel V's two lasers and customize the treatment settings to target the color and depth of your skin concern. Most treatments are finished in just a few minutes.

What are the benefits?

For most procedures, excel V provides quick treatments with best results within just a few days. Most procedures only take 5 to 10 minutes but some may take up to 45 minutes.

Is the treatment painful?

Excel V treatments can feel similar to a rubber band snapping against skin. Depending on the procedure, a cooled treatment tip will be in contact with the skin to protect and provide comfort to the area. A topical anesthetic may be available from your provider to improve your treatment experience.

What about side effects or downtime?

Redness and/or swelling can be expected following treatment and will resolve within a few days. Treated brown spots will darken and slough off within 3 to 6 days. For full face treatments, swelling will peak 24 to 48 hours post treatment and usually resolves within a few days. Typically, you can wear make-up and return to normal activities immediately. Your provider may recommend a topical steroid to reduce swelling as needed.

**Laser treatments are not recommended for pregnant or nursing women, or those undergoing treatment for skin cancer. If unsure, please check with your physician.*
